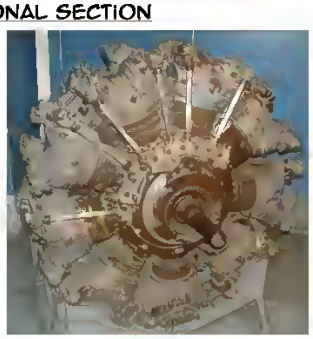
INFORMATIONAL SECTION

Page 27: The **Nakajima Homare** was an 18-cylinder air-cooled used during the mid- to late- WWII period. The engine design that was known for being very small. While powerful, it was hard to maintain and poor field repairs led to an overall loss of power in the field. The engine became the main powerplant of IJA and IJN aircraft during the later stages of the war, such as the N1K-J Shiden "George". *-https://en.wikipedia.org/wiki/Nakajima Homare*



Page 31-32: The **Tanashi Tower** (aka: West Tokyo Sky Tower) is a multi-use communications tower in the western Tokyo suburbs of Chome Shibakubo. It has been featured in such series as *Sgt. Frog* and *Crayon Shin-chan* due to it's close proximity to **Shin-Ei Animation.** *-https://ja.wikipedia.org/wiki/スカイタワー西東京*
